

LA GERAUDIÈRE

Agrifood - Life sciences

③ NORTH NANTES

People, ideas and savoir-faire

Companies : Eurofins Scientific (a world leader in bioanalysis), Toxilabo (toxicological analysis), Adriant (sensorial analysis).

Research centers : INRA (the French National Institute for Agronomic Research, with 250 staff from 9 research units focused on 4 broad areas: the processing of plant material and animal products, human nutrition and food, economics and sociology).

Technical Centers : Tecaliman (an animal feed technical center and technology transfer), CTCPA (Technical Center for the Conservation of Agrifood Products).

Higher education : ENITIAA (the French National School for Agricultural and Food Industry Technologies).

General location

Situated in the heart of France's leading agricultural region, the La Géraudière site is dedicated to life sciences. It gathers together a wide range of skills in the feed and food processing and packaging sectors.

The site offers a documentary resource center for the agrifood industry (**Iquabian**) and a 2,000 m² technology platform within the ENITIAA dedicated to food process engineering and food hygiene.

Site development

Totaling 70 acres, the site benefits from good road and public transport access, and significant development opportunities exist for an additional 10 acres. The available plots comprise an industrial development pre-equipped with roadways and utilities. A redevelopment scheme is planned in order to improve the site's visibility and accessibility. La Géraudière is on a tramway route and features a common canteen for tenant companies and labs.

Business accommodation

The site features 3,200 m² of lab, office and production modules designed to meet the most stringent hygiene criteria. The building is fitted out with agrifood sector-specific equipment.
